

Exceptional Outdoor Living In Harmony With Nature

The steadily increasing demand for exquisite hardscaping and landscaping has challenged professional landscape designers to create the most inspiring outdoor environments ever. Top companies have surpassed expectations to produce fabulous results.

No longer are luxury hardscapes and gorgeously manicured landscapes limited to estate properties, and fortunately not all such landscaping carries an estate landscaper's price tag! An exceptional landscape project begins with a plan custom-designed by a dependable design/build company that understands how you want to use the space, your design sensibilities, and how to bring it all within your budget.

Just imagine stepping outside to a picturesque water feature that dazzles the senses with soothing sounds and beautiful views. In the evening, gather with friends to dine alfresco on a custom patio surrounded by lush plantings. And as the sun goes down, sojourn to a Tuscan-style fire pit or lounge in style around a custom pool deck beautifully illuminated with accent lighting. If you can dream it, your landscaper can create it.

In order to assure the success of your project, your design/build firm needs to have skill and experience not only with natural stone and hardscaping, but landscaping as well. Premier landscapers will have a comprehensive knowledge of plants, trees and grasses, their care and maintenance, as well as what plantings work well together. Employing their unique skills, artistic sentiments and practical knowledge, landscape designers work with, not in spite of, the natural surroundings to sculpt magnificent outdoor living settings in harmony with nature, bringing out the full potential of your property. They can create an entirely new landscape from a blank slate, or take your existing layout and incorporate fresh and exciting new details to increase the visual, functional and aesthetic appeal of your property.

A full-service landscaping contractor will be able to handle all aspects of the design and construction of your landscape plan, whatever the scale. Consistent, proper construction practices will assure the best possible results, so choose a reputable landscape firm with experience and verifiable credentials such as Interlocking Concrete Pavement Institute (ICPI) certification and membership in the exclusive EP Henry Authorized Hardscaping™ program. These contractors are pre-screened professionals who are monitored on a regular basis by EP Henry to ensure their work is of the highest quality.

Experts in natural stone, concrete pavers and landscape design, DeMichele, Inc. of Media PA has the vision, the expertise, and most importantly, the experience to build a cohesive plan that is in harmony with your lifestyle, your property, and your wallet. DeMichele is a full service residential landscape contractor; an all-inclusive design/build company capable of overseeing and implementing all aspects of your project.

So, whether it's foundation elements such as hardscaping and landscaping, luxurious amenities like outdoor kitchens and fireplaces, stylish accents of lighting or water features, or all-inclusive irrigation and maintenance services, the experienced professionals at DeMichele can create a distinctive property that will enhance your life and value of your home. For more information, please contact Blase DeMichele at (610) 361-7832 or visit www.DeMicheleinc.com and start planning your backyard oasis. **DL**
